In the spirit of Prince Albert's original Great Exhibition, which showcased the most exciting Victorian technology and inventions from 1851, students across the country will take part in engineering challenges and create their own Great Exhibitions at home!

For this year's challenge, participants will submit a 1 minute video presenting their Great Exhibition at Home, which tackles the question:

How can engineering help protect the planet?

Learn how to touch type

There are four levels to play, each divided into three stages.

You start by learning the home row keys. Each stage builds on previous lessons, introducing new letters as you progress. You'll soon be touch typing like an expert!

At the end of each level you can test your typing speed and get a fun reward.

Train like an Astronaut

Teams of students complete activities to earn points and help the Mission X mascots, Luna and Leo, walk to the Moon.

<https://www.stem.org.uk/missonx>

A black and white photograph of the Moon's surface, showing craters and lunar terrain, serving as a background for the title.

moon camp challenge

Explore the extreme environment of space and understand how astronauts could live on the Moon.

Design your own Moon Camp, which should be adapted to the Moon environment, consider the use of local resources and provide protection and living and working facilities for the astronauts.

Careers Inc

During this uncertain and challenging time, we would like all the students and parents/carers across all the schools we work with to know that they can still contact us to arrange a meeting with an adviser.

Fancy having a go at some science experiments from the comfort of your own home?

STEM Clubs have a huge bank of resources available to download that include both short and long term projects.

Create models, analyse animal behaviour and even predict the future in science!
